PROFESSIONAL SUMMARY

Computer Technician with hands-on knowledge in end-user support, computer setup, operating system management, hardware troubleshooting, and basic network management. Continuously developing myself in Windows Server, Active Directory, and system administration. Aiming to analyze technical problems to provide permanent solutions, learn new technologies, and take part in corporate IT infrastructures.

TECHNICAL PROJECTS

Network Setup and Security

- Configured connections for modems, routers, switches, and client devices in small-scale network environments. Implemented applications in IP configuration, internet sharing, and basic network security.

Windows Server Laboratory

- Installed Windows Server on Hyper-V to create Active Directory, DNS, DHCP, Group Policy, and Domain environments. Performed user and group management practices by joining client computers to the domain.

Disk Cloning and Network Creation

- Performed SSD/HDD cloning, operating system installation, driver loading, and preparation of computers for the network environment.

Operating System Installation

- Installed various operating systems, primarily Windows 10, Windows 11, Windows Server, and Ubuntu, in physical and virtual environments. Gained experience in disk configuration, driver installation, and basic system administration.

WORK EXPERIENCE

Mehmet Akif Ersoy University

IT Staff (03/2024 - 05/2024)
